

Bangladesh Journal of Dental Research & Education
Official Publication of Bangladesh Academy of Dentistry International

Editorial

I would like to express my heartfelt gratitude to the members of Bangladesh Academy of Dentistry International, bestowing upon me the great responsibility as an editor-in-chief, to edit and publish Bangladesh Journal of Dental Research and Education, the official publication of Bangladesh Academy of Dentistry International which has successfully obtained ISSN # 2225-9015. I tried with my utmost sincerity to march the academy one step ahead to best of our combined efforts. I feel proud, privileged and happy to carry out such responsibility and obligation entrusted upon me by my fellow members, especially to Dr. Md. Jahangir Kabir, President, Bangladesh Academy of Dentistry International. The Journal will be published bi-annually in the month of January and July each year. I would expect to all to support by contributing their dental related scientific articles for continuous publication of this journal. I do appreciate that, all the members both from home and abroad are coming forward and are helping the editorial board for publication of this scientific journal. This will in turn upgrade Dental Education and research in Bangladesh, and become parallel with international arena of competitive Dental Education and Research.

Our main mission is to combine Dental education, research, training and other dental related information. This journal may initially face difficulties in trying to meet the different aspirations and requirements of its readership with their different backgrounds and needs. However, we believe that the gradual change in structure and presentation of the journal in due course of time will fulfill our dream, that the different needs of general practitioners, post graduate students, trainees and relevant auxiliaries can all benefit by this journal.

At this historical and happy moment, it's my privilege to acknowledge the noble contribution of RENATA Pharmaceuticals with the highest honour for their technical and financial support in publishing this journal.

Finally, may I wish you all, wherever you are, a happy new journey in the field of Dental Research and Education in Bangladesh with the publication of '*Bangladesh Journal of Dental Research and Education*'

Dr. Chowdhury Moin Jan, BDS, PhD
