# BJOG yearly CME program

### Name of the Article:

Complications during Vaginal sacrospinous fixation along with McCall Culdoplasty in Stage III and IV POP

Page no (90)

# Q. Following statements are true or false?

- In Bangladesh, about half a million women are suffering from stage III or IV pelvic organ prolapse (POP
- b. Vaginal axis has longitudinally, superior to the levator plate
- c. Abdominal sacro-colpopexy has the lowest recurrence rate
- d. McCall Culdoplasty is useful for vault prolapse

#### Name of the Article:

Preoperative, intraoperative and Postoperative Assessment of pelvic organ prolapse by Pelvic Organ ProlapseQuantification System and surgical outcome

Page no (109)

- Q. Following statements are true or false?
- a. Life time risk for surgery for POP in elderly women is 11 to 20%.
- b. In stage III prolapse the Quantification value is 3.
- c. Symptoms, urge incontinence associated with lowest point of upper anterior vaginal wall descent (Ba)
- d. Preoperative measurement after valsalva is more accurate than presurgical after anesthesia

## Name of the Article:

Maternal and Neonatal Risk Factors for Developing Early Onset Newborn Sepsis (EONS) in a tertiary care hospital in Bangladesh Page no (132)

- Q. Following statements are true or false?
- a. Incidence of neonatal septicemia is 1.6% of all live births.

- b. Neonatal sepsis is responsible for (30-50) % of neonatal deaths.
- c. Female neonates are more susceptible to septicemia than males
- d. In this study 90% subjects had maternal risk factors of sepsis

#### Name of the Article:

Birth defect: Findings from Obstetrics & Gynae Department of a tertiary Hospital Page no (127)

- Q. Following statements are true or false?
- a. Nearly 8 million children are born with a serious birth defect globally each year.
- b. The commonest birth defect in this study was Musculoskeletal system defect
- c. The ICD-10 code for Gastroschisis is Q 79.3
- d. Birth defect are more more common in babies born to young mother

#### Name of the Article:

Psychosocial and perceived stress associated with Pre-eclampsia in a periurban hospital Page no (119)

- Q. Following statements are true or false?
- a. Pre-eclampsia occurs in 4 to 7 per cent of pregnant women globally.
- Nulliparity, a family or self-history of pre-eclampsia and increased body mass index is risk factor for pre-eclampsia.
- Positive history of maternal mood disorder is associated with 2.12-fold increased risk of Preeclampsia
- d. In the study about 76.1% expressed high perceive stress and 14.1 low stress.
