Do you have any conflict of interest with the author/s? <b>No</b>		
Do you wish to be disclosed to the author? <b>Yes</b>		
	Score	[Note: Provide response/s if score is below 6]
How would you rate the originality and depth of the manuscript?	6	-
Is the manuscript written in a scholarly manner?	5	Re-wrote the case report as per journal's rules and scientific manner.
Does the manuscript have the potential to make a valuable contribution to the world of knowledge?	6	-
Does the manuscript meet ethical standards?	6	-
Overview: This is an average manuscript of a good case.		The storytelling is revised. Due to word limit all points had to put in short
1. There is no conclusion		Added a conclusion under discussion without heading.
2. There are several linguistic issues (corrected in the text)		Linguistic issues are corrected according to guidance.

How would you rate the originality and depth of the manuscript?	6	-
Is the manuscript written in a scholarly manner?	4	Re-wrote the case report as per journal's rules and scientific manner.
Does the manuscript have the potential to make a valuable contribution to the world of knowledge?	7	-
Does the manuscript meet ethical standards?	6	-
Major points		Revised the manuscript as per journal's format.
1. Submit the manuscript in a single file (title page plus main text). Follow the sequence of a case report on our website ( <a href="https://www.banglajol.info/index.php/BSMMUJ/index">https://www.banglajol.info/index.php/BSMMUJ/index</a> ). You will also find a template for the case reports in our author instructions.		

REVIEW COMMENTS	AUTHOR RESPONSE
2. How was diagnosis of DSD ascertained?	As the individual brought up as female with genital ambiguity and her karyotyping was 46XY, the diagnosis was made as such. The description of diagnosis has given under “Case description and management”.
Minor points: 3. More published evidence should be included in the discussion along with its pathophysiology and diagnosis.	As words count for case report is limited so detailed discussion with pathophysiology has been shortened and there are very few cases like this worldwide Those evidences are added in the discussion section.
