

REVIEW REPORT

Title: Multimodal intervention for congenital muscular torticollis: Visual and neck stability exercises compared to stretching

Authors: Elansuriyan Sambandam, Murali Ravi, Manikandan Malayappan, Ramya Kandhasamy, Ranjitha Ramar, Anees Ahmed Farooq Mohammed

Reviewer E: T Makarandhan, **ORCID:** 0000-0003-1927-7811, **COI:** None, **AI disclosure:** None

1. **Comment** Elaborate the findings and draw conclusions by comparing with recent literature and guidelines in clinical practice.
Response: The manuscript has been carefully edited for scientific clarity, readability and overall presentation.
2. **Comment** It is recommended to conduct a last language and grammatical check for readability.
Response: Specifically, we have included the requested manuscript overview, added recent literature to reinforce the discussion, thoroughly edited the language and grammar.
3. **Comment** In Page no 4, line no 91, Intervention photographs (see Figure 1) are not necessary to interpret the results of this manuscript and may be deleted to enhance conciseness and to fit the briefer format of Research Letter.
Response: Removed the photographs of the intervention to conform to the Research Letter format

Responsible editor: M Mostafa Zaman, **ORCID:** 0000-0002-1736-1342

4. **Comment** Provide the full name of all authors.
Response: Included the full names of all authors as requested by the editor, and formatted the references and presentation
