

FROM THE DESK OF EDITOR IN CHIEF

Geriatric populations are increasing globally. According to UN survey geriatric population was 1 in 11 in 2019 with expected increase to 1 in 6 in 2050. Japan and Italy has highest oldest population. In Bangladesh 13 millions are above 60 in 2019. Geriatric complications are numerous, but global need is successful ageing. Successful aging parameters are- physical, psychosocial, social and leisure activities. In this context, in all the tertiary level hospitals of our country should have well structured geriatric ward.

We are now regularly publishing the Central Medical College Journal which is indexed, keeping the best standard with peer reviewed articles. The editorial board members wholeheartedly giving their opinion and time for all the issues of the journal to raise the standard unique.
