CPD Programme

Continuing Professional Development (CPD) is a process by which individuals take control of their own learning and development, by engaging in an on-going process of reflection and action. It assists the medical professionals to keep them up-to-date to meet the needs of the patient and health care services and to upgrade their knowledge, skill and attitude. The Coronavirus Disease 2019 (COVID-19) pandemic has caused an unprecedented disruption in medical education. In Enam Medical College seminars were held regularly before COVID-19 pandemic. Seminars were not organized during the period of May to August 2020 due to lock-down and safety issues.

CME Programme

To enhance communication skill in teaching and learning and efficiency of judgment of teachers, especially the freshly appointed teachers in the assessment in examinations and to improve medical teaching standard of teachers by refreshing knowledge, skill and attitude, continued medical education (CME) programmes are very much needed. It is also essential to make them oriented with the updating of education system, teaching and research methodology and to share experience and views of senior faculties. In this perspective, medical education unit of Enam Medical College is arranging teaching and learning session for all teachers of the college every two months. The COVID-19 pandemic has affected healthcare systems worldwide. The disruption to hospital routines has affected continuing medical education also. Programmes had switched to video conferencing to maintain teaching. Some programmes also utilized small group teachings with precautions and e-learning modules. Teachers actively participated in these sessions.

Opening of COVID-Unit at Enam Medical College and Hospital: A time pleaded amenity has been established

As corona virus continues its dissemination across the world, hospitals are bracing for the inflow of patients who will need care for the most serious effects of the disease it causes. To handle the influx of COVID-19 patients, Enam Medical College has started a separate COVID unit since May 2020. The specialized doctors, nurses, and other staffs rose to the demand of the time and are doing everything one can do, which reminds us the contribution of this hospital in “Rana Plaza tragedy”. Enam Medical College has the most sturdy and comprehensive COVID care amenity in the nation. Moreover, 125 separate beds were allocated to treat the positive patients, among them 25 were in ICU and 80 beds were in HDU. To supplement this, hospital have round-the-clock specialist for instance, Internal Medicine, Pulmonologist, Radiologist, Cardiologist, Nephrologists along with a current well-equipped treatment facility segregated from non-COVID area. Around 1761 patients were getting treatment till now and the authority of this institution declared the treatment free for underprivileged. Hope the newly opened service can serve a larger number of patients with a scientific approach.
